### Headquarters Frequencies for OTHER BANDS:

30M CW 10.129 MHz CW  
17M SSB 18.163 MHz USB  
15M SSB 21.363 MHz USB  
12M SSB 24.963 MHz USB  
10M SSB 28.363 MHz USB

### Headquarters DIGITAL frequencies for CW, PACTOR, PSK31, etc.:

1.988 MHz, 3.723 MHz, 7.063 MHz, 10.129 MHz, 14.063 MHz,  
18.093 MHz, 21.063 MHz, 24.923 MHz, and 28.063 MHz

Storehouse operators are encouraged to locate a local IRLP node that can be connected to channel 9 of the Western Reflector (node 9259) during net operations and in an emergency or when the above frequencies will not support signal propagation. In addition, install EchoLink on a computer that can be used at the storehouse if a local IRLP node cannot be found or cannot be connected to 9259. EchoLink Conference Server \*ERC-ECS\* (#328327) is bridged to 9259.

Headquarters operators will call a net on IRLP reflector 9259 at the time indicated on the net schedule to allow storehouses to contact Church headquarters by an alternate communication path. IRLP Western Reflector 9259 (Channel 9 of the Western Reflector) will be monitored at headquarters during all emergency operations.
